

## UNION INTERNATIONALE CONTRE LE PERIL VÉNÉRIEN ET LES TRÉPONEMATOSES

GROUPE INTERNATIONAL D'ÉTUDES DE LA TRICHOMONASE HUMAINE  
(G.I.E.T.H.)

Following the symposium on human trichomoniasis held at Rheims in May, 1957, a conference of international representatives was called under the chairmanship of Dr. Gaston Chappez. This resulted in the formation of an international group to maintain interest and to pursue further studies in this field. G.I.E.T.H. has been constituted a permanent commission under the auspices of the U.I.P.V.T. with headquarters at the Institut Alfred Fournier, Paris. The objectives of the study group are as follows:

- (1) To set up an international registry of research workers especially interested in the field of human trichomoniasis.
- (2) To promote international scientific meetings. G.I.E.T.H. participated in the organization of the First Canadian Symposium on Non-gonococcal Urethritis and Human Trichomoniasis held at Montreal on September 21–22, 1959.
- (3) To aid in the publication of original articles or their abstracts in the various foreign journals.
- (4) To assist the various research workers in contacting the many public and private organizations for grants.

All research workers and other persons particularly interested in this field are urged to become members of this organization by sending the following information to G.I.E.T.H., Institut Alfred Fournier, 25 Boulevard St.-Jacques, Paris XIV<sup>e</sup>, France.

- (a) Name and address.
- (b) Present university and/or hospital appointments.
- (c) Bibliography of publications relating to trichomoniasis.
- (d) Current interests and investigations.

### OFFICERS AND MEMBERS OF G.I.E.T.H.

*President:* DR. PIERRE DUREL, Directeur, Centre d'Études sur les Urétrites Non-gonococques. Institut A. Fournier, Paris (France).

*Vice-President:* DR. LOUIS G. FEO, Research Associate in Clinical Urology, Jefferson Medical College and Hospital, Philadelphia 7, Pa (U.S.A.).

*Secretary-General:* DR. GASTON CHAPPAZ, École Nationale de Médecine, 51 Rue Simon, Reims (Marne, France).

#### *Members:*

DR. ADAM BARTOSZEWSKI, Gynaecological and Obstetric Clinic, ul. Lubartowska 81, Lublin (Poland).

DR. HELMUTH BAUER, Privat-Dozent, Faculty of Medicine, Rathsbürgerstrasse 48 – Erlangen (Federal Germany).

PROF. JOSÉ MA BEDOYA, Dept. of Gynaecology, Faculty of Medicine, Seville (Spain).

PROF. R. BOURG, University of Brussels (Belgium).

PROF. GIOVANNI BATTISTA CANDIANI, Obstetric and Gynaecological Clinic, "L'Mangiagalli", Milan (Italy).

PROF. OTTO JIROVEC, Department of Parasitology at the Charles IV University – Members of the Academy of Science, Viniona 7, Prague II (Czechoslovakia).

MR. AMBROSE KING, F.R.C.S., Senior Physician, White-chapel Clinic, The London Hospital (England).

PROF. PETER KOSTIC, Faculty of Medicine, Belgrade (Yugoslavia).

DR. ALFRED B. KUPFERBERG, Director, Division of Microbiology, Ortho Research Foundation, Raritan, New Jersey (U.S.A.).

DR. MASANAO MAGARA, Professor of Gynaecology and Obstetrics, Nippon College of Medicine, 59 Komagonesenda-gicho, Bunkyo-Ku, Tokyo (Japan).

DR. ALEXANDRU PERJU, 95 Boulevard du 6 Mars, Bucharest (Roumania).

DR. PAL SALACZ, Privat-Dozent, Faculty of Medicine, Budapest (Hungary).
